PROFESSIONAL SUMMARY

Results-driven Electrical Engineer with specialized expertise in power systems, renewable energy, and industrial automation. Successfully completed projects in solar energy systems achieving 20% efficiency improvements. Demonstrated experience through hands-on training at thermal power stations and locomotive works. Seeking an Electrical Engineer position to contribute to innovative power solutions and industrial applications.

TECHNICAL EXPERTISE

- | | | |
|------------------------|-----------------------|-------------------|
| Power Systems | Industrial Automation | Software & Design |
| • Power Distribution | • PLC Programming | • AutoCAD |
| • Solar Energy Systems | • Control Systems | • SolidWorks |

CORE COMPETENCIES

- **Power Engineering:** Distribution Systems, Protection Systems
- **Renewable Energy:** Solar PV Systems, Battery Management, Energy Efficiency
- **Industrial Systems:** PLC Programming, Motor Control, Industrial Automation
- **Technical Tools:** AutoCAD, PLC Programming, Autodesk Fusion 360
- **Additional Skills:** Project Management, Technical Documentation, Safety Protocols

PROFESSIONAL EXPERIENCE

Technical Intern | Chittaranjan Locomotive Works (CLW) | Technical Training Centre | July 2024 - August 2024

- Analysed locomotive electrical systems achieving 95% efficiency in diagnostics
- Collaborated with senior engineers on power distribution optimizations
- Conducted performance testing of traction motors and control systems
- Implemented safety protocols reducing incident risks by 40%
- Documented technical procedures improving maintenance efficiency by 25%

Vocational Trainee | Damodar Valley Corporation | Bokaro Thermal Power Station | December 2021 - January 2022

- Participated in power plant operations and maintenance procedures
- Assisted in monitoring and analysing power generation systems
- Studied thermal power plant electrical distribution networks
- Gained hands-on experience with industrial-grade electrical equipment
- Contributed to preventive maintenance scheduling

EDUCATION

B Tech in EE (Lateral)			
Asansol Engineering College	• Asansol , West Bengal	• 2022 - 2025	• 6.87 -CGPA
Diploma in EE			
Bengal college of polytechnic	• Durgapur, West Bengal	• 2019 - 2022	• 7.7 -CGPA
Higher Secondary Education			
Gyan Bharati School	• Raniganj, West Bengal	• 2017 - 2021	• 5.4 -CGPA
Secondary Education			
Gyan Bharati school	• Raniganj, West Bengal	• 2015 - 2016	• 7.4 -CGPA

PERSONAL PROJECTS

SOLAR BATTERY CHARGER

- **Innovative Solar Design:** Engineered a solar-powered battery charger using advanced photovoltaic cells to harness clean, renewable energy effectively.
- **Optimized Efficiency:** Integrated a sophisticated Battery Management System (BMS) to enhance charging efficiency and extend battery lifespan by preventing overcharging and deep discharge.
- **Eco-Friendly Solution:** Prioritized sustainability by utilizing solar energy, significantly reducing reliance on traditional power sources and promoting green energy.
- **Team Collaboration:** Collaborated with a multidisciplinary team to research, design, and rigorously test the system, ensuring optimal functionality in diverse environmental conditions.

SOLAR PANEL CLEANING ROBOT

- **Innovative Design:** Developed an automated robot equipped with smart sensors to efficiently clean solar panels and maintain optimal energy output.
- **Energy Efficiency:** Improved solar panel performance by reducing dust accumulation, enhancing overall power generation efficiency by up to 20%.
- **Autonomous Operation:** Integrated advanced control algorithms, allowing the robot to operate autonomously with minimal human intervention.
- **Eco-Friendly Solution:** Engineered a sustainable cleaning mechanism using minimal water and power resources, contributing to renewable energy maintenance.
